(54) Power module.

(57) In order to accomplish the miniaturization of a power module, the invention proposes such one which comprises a high frequency multi-stage power amplifier circuit which includes a chip part and a power amplifier semiconductor each mounted on a printed-circuit board that is firmly fixed to a heat radiation plate by fixing means like soldering, wherein there is arranged a microstrip line in an area of the printed-circuit board under a surface mounting type package in which said power amplifier semiconductor is mounted.

Office

EP 93 105 378. 1

### CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid.  
namely claims:
- No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

### X LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions,  
namely:

- All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid.  
namely claims:
- None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims.  
namely claims:

European Patent  
Office

EP 92105378 - B -

#### LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims 1,11,12: Power module with wiring pattern formed on the backside of a circuit board.
2. Claims 2,3,4: Power module with higher harmonic resonance circuits comprising microstrip lines and capacitances.
3. Claim 5: Power module with resistor inserted between amplifier stages.
4. Claims 6,7: Power module with openings in the resist coating.
5. Claims 8,9,10: Power module with in common connected circuit parts.
6. CLaim 13: Pattern of microstrip line.
